WELLS FARGO AND FORCED CONSUMER ARBITRATION SEPTEMBER 2017 UPDATE

This report provides a comprehensive overview of consumer arbitrations involving Wells Fargo from 2009 though the first half of 2017 ("1H2017"), as reported by arbitration firms pursuant to California's arbitration disclosure mandate.

The research was performed by Level Playing Field, a non-profit organization that collects, analyzes, and publishes data on consumer arbitration cases. Level Playing Field has developed a consumer arbitration database that allows the general public to quickly and easily search consumer arbitration cases by fields such as business name, arbitrator name, attorney name, and state.¹

The original data for this report was provided by the American Arbitration Association (AAA), which routinely provides arbitration services to Wells Fargo.² A handful of additional cases were filed with another arbitration provider, JAMS (initially named Judicial Arbitration and Mediation Services, Inc.).³

BACKGROUND

Wells Fargo serves 70 million over including customers, one in three households in the United States, through more than 8,600 locations, 13,000 ATMs, the internet, mobile banking and distribution channels across the U.S. Wells Fargo provides services to consumers, businesses and institutions in all 50 states and the District of Columbia. 4

As a standard practice, Wells Fargo includes forced arbitration agreements in its consumer account agreements, which block consumers from filing lawsuits in public court and ban consumers with similar claims from joining together in class actions.⁵

FIGURE 1. WELLS FARGO CLOSED ARBITRATION CASE COUNT BY HALF YEAR, 2010-17

² The AAA data goes back to 2009.

³ The JAMS data goes back to 2011.

⁴ Wells Fargo 2016 Annual Report, pages 36, 46 and 132.

⁵ Level Playing Field reviewed consumer account agreements published in the Consumer Financial Protection Bureau's credit card agreement database: https://www.consumerfinance.gov/credit-cards/agreements/.

SUMMARY

In 1H2017, 35 Wells Fargo arbitration cases were closed. This is up from 21 in the 2H2016 and relatively unchanged from 37 in the 1H2016, despite public knowledge of 3.5 million fraudulent accounts and credit cards following reports mid-way through 2H2016. This is a continuation of the trend of higher case volume that began in 2014. (See Figure 1)

Average Award		\$ 19,354	\$ 8,528

Cases were closed in nine of the 50 United States. The states with the most closed consumer cases were California (11), Florida (6), Illinois (5), Arizona (4), and Connecticut (3). (See Figure 2)

Of the 35 subject cases, 26 were settled and four went to a final hearing and award. This 74% settlement ratio for 1H2017 is up significantly from the 55% average settlement ratio from 2009-2016. Conversely, the 11% awarded ratio for 1H2017 is down significantly from the 22% awarded ratio from 2009-2016. (See Figure 3)

Of the four awarded cases, consumers were designated the "prevailing party" in one and received a total of \$2,557. Whereas Wells Fargo was designated the prevailing party in two cases with no award amount listed. In the single remaining case, the prevailing party was undefined but Wells Fargo was awarded \$723 compared to zero for the consumer. (See Figure 4)

The consumer was the initiating party in all four awarded cases. The consumer succeeded in only one of the four cases where a prevailing party was identified (25% success rate). By all accounts, Wells Fargo succeeded in the remaining three cases (a 75% success rate) but was defined as the prevailing party in only two (a 50% success rate).

From 2009 through 1H2017, Wells Fargo was identified as the prevailing party in twice as many cases as consumers (15 compared to 8). (See Figure 5)

In conclusion, Wells Fargo continues to experience a shockingly low number of arbitration claims despite its enormous customer base and continued revelations of widespread unfair business practices.

METHODOLOGY

Wells Fargo appears in the Level Playing Field database under dozens of variations of its name. For example, "Wells Fargo NA", "Wells Fargo Bank, N.A.", "Wells Fargo Card Services", etc. For the purposes of this report, these variations and/or separate legal entities were treated as one.

The Level Playing Field database includes 281 unique Wells Fargo cases from 2009 to 1H2017. Of those, 21 are debt collection, seven are employment disputes, two are business/commercial, and one is a new home construction case. Because we are interested in the outcomes of consumer banking cases, we have excluded these 31 cases from our analysis. As such, this report is based on 250 cases (221 from AAA and 29 from JAMS).

ACKNOWLEDGMENT

This report was created by Level Playing Field at the request of the Consumers for Auto Reliability and Safety (CARS) Foundation, and with the Foundation's support.
